

## DIAPERING PROCEDURE

---

---

1. **Get all of the supplies that you need (diapers, wipes, gloves, clothes, etc.).**
2. **Wash your hands, following the recommended procedure, and put on gloves.**
3. **Pick up the child, holding him up or away from your clothing if you know he or she is soiled. Place the child on the changing table and buckle the strap to assist holding him or her in place. Never leave a child unattended, even if she or he is buckled in.**
4. **Remove clothes. Bag soiled clothes and securely tie the plastic bag to send home. Open diaper and fold over the tabs so they do not stick to the child's skin. Leave the soiled diaper under the child.**
5. **Clean the child with baby wipes from front to back using a fresh wipe each time. Use as many wipes as necessary. Pay close attention to cleaning the folds of skin. Place the wipes inside the dirty diaper.**
6. **Remove the dirty diaper from underneath the child. Resecure diaper with tabs.**
7. **Remove latex gloves by holding diaper in left hand and using the right hand to pull the left glove off your hand and over the diaper. Repeat with the right hand. This procedure helps to secure the germs stay inside the diaper and gloves.**
8. **Dispose of the diaper in a covered, lined step can if it is possible to do so without leaving the child.**
9. **Wash hands with a disposable wipe.**
10. **Put the clean diaper on and redress the child.**
11. **Assist the child in washing his or her hands. If the child is too young, you can wash the hands with either a baby wipe or we, soapy paper towels. Be sure to remove all soap from the child's hands. Return the child to the play area.**
12. **Dispose of all materials, is it wasn't possible to do so before now.**
13. **Sanitize the changing area using a bleach and water solution and disposable paper towels.**
14. **Wash your own hands according to the procedure mentioned above. Record the diaper change on the child's chart.**
